

Manufacturer. Consultant. Implementer.

ERP + MES from manufacturing specialists

PSI 

MORE THAN SOFTWARE

ERP and MES is just one side of the coin .

Every company is unique. We listen to our customers and firmly believe that the best ideas and intelligent solutions emerge from the exchange of ideas. We are specialists who share a strong passion for production with our customers.

Innovative ERP and MES software is just one side of the coin. Fostering a close exchange with our customer is much more important to us. PSI supports companies as an independent innovator on the way to the factory of the future.

Expertise + passion =
MAXIMUM SUCCESS

PRODUCTION EXPERTISE

Well-thought-out solutions for your industry.

PSI Automotive & Industry is an expert in production. PSI aids decision-making in complex situations, automates your processes and increases the efficiency of your production facilities with the help of industrial intelligence.

THE BEST SOLUTION IS WORKING TOGETHER AS EQUALS

A comprehensive approach incorporating all systems and processes.

Today, companies are absolutely reliant on ERP and MES systems that give optimum support to industry-specific processes and standards. When considered as a whole, it is not only ERP and MES components that are significant. Businesses must also apply a comprehensive approach that incorporates all systems and processes.

PSI Automotive & Industry focuses on production and is firmly at home in the manufacturing industry. We optimize production facilities and processes using ERP + MES software that supports the entire value chain of medium-sized companies in the automotive industry and the mechanical engineering and plant construction sectors.

ENTERPRISE RESOURCE PLANNING

We can provide custom solutions to support your company-specific or industry-specific requirements.

PSIpenta is the ERP system that enables mid-sized manufacturing companies to realize their full potential. As an ERP provider for intelligent production, we combine profound industry knowledge with agile software to help our customers overcome their challenges.

Overview of areas and modules in PSIpenta/ERP

- ✓ Purchasing & Sales
- ✓ Accounting & Controlling
- ✓ Production
- ✓ Logistics
- ✓ Project Management
- ✓ Service Management

Figure: The PSI platform is based on Java technology and provides a powerful foundation for PSIpenta.

We're here to help!

MANUFACTURING EXECUTION SYSTEM

A workflow-based MES is the backbone of any company.

Do you want to get the most out of your production department? PSI is the leading MES provider for mid-sized manufacturing companies. We would be glad to share with you our passion for production and our expertise.

Overview of PSIpenta/MES modules

- ✓ Order Management & Sequence Planning
- ✓ Resource Management
- ✓ Material Management
- ✓ Shop Floor Management
- ✓ Quality Management
- ✓ Performance Analysis
- ✓ Workflow Management
- ✓ Platform for Production
- ✓ Worker Assistance

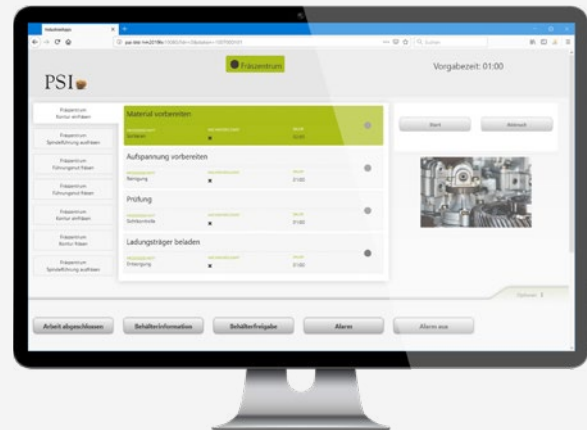

Figure: The Worker Assistance supports production employees in the workflow and includes diagrams and process-dependent procedures.

From experience we know: you can achieve maximum performance using an adaptable MES that allows production processes to be easily adjusted without the need for programming.

Our processes modeled in BPMN 2.0 are executed directly. This facilitates communication between specialist departments and the development team and significantly shortens development cycles.

TECHNOLOGY MUST ADAPT TO SUIT PEOPLE, NOT THE OTHER WAY ROUND

Make your company fit for digitalization with PSI.

Tired of clicking through the overloaded views of your IT applications to get to the screens that are relevant to you? Things are different with the configuration options of PSI-Click-Design, which is based on the Java-based PSI framework.

PSI has successfully used robust approaches to artificial intelligence in industry for a long time. This supports decision-making in complex situations, automates processes and increases production efficiency.

Our promise

Powerful production platform

Highly available and scalable PSI framework based on the latest Java technology

A strong community

Customers benefit from the large PSI Group development community

Easy-to-learn development methodology & software basis

Extensive use of important industry standards.

„In the **first three months** alone, we were able to reduce our inventory levels by more than one million euro. That represents a **stock reduction** of 15% for the first product group and around 25% for the second product group.“

Matthias Fick, Head Of Production & Logistics at Gemü Apparatebau

DOES VERSATILE PRODUCTION WITH QUICKLY ADAPTABLE PROCESSES SOUND LIKE A FAIRY TALE?

Workflow capabilities are currently experiencing a revival in the field of ERP and MES systems.

A workflow changes the way companies work. They give companies the opportunity to become more agile while simplifying work for employees.

With PSIpenta MES, processes no longer need laborious programming. Modeling is performed in BPMN 2.0, which allows functions from different IT systems to be combined in a single user interface.

Our strengths – your benefits

- ✓ Reduce the burden on your IT departments
- ✓ Reduce the cost of external adjustments
- ✓ Join our customer community and have your say

Scan to find out how to customize ERP and MES interfaces.

„We have **production under control** with PSIpenta. My employees are delighted with the degree of transparency in Production.“

Yu Han, MES Project Manager in the Linde Engineering Division

200 EXPERTS IN PRODUCTION

We know and fully understand our customer's challenges and speak a common language.

PSI has played a key role in digitalization in Germany since 1969 and has successfully completed countless projects. Our secret: we are specialists and share with our customers a strong passion for manufacturing processes.

80% of PSI's employees are engineers. For us, optimizing production is more than a matter of technology—we put our heart and soul into it. Our clear focus on production gives us the experience and knowledge you need to progress in a competitive environment.

We are skilled innovators, advisors who listen and agile implementers. Let us work with you to design your perfect production process!

HOW WE WORK

We listen, exchange ideas, optimize processes and initiate improvements.

COOPERATIVE INTELLIGENCE

Open exchange is the key to deeper understanding. Only when we bring together knowledge, experience and skills can new ideas emerge. We know that successful software projects are not a one-way street, but are the result of agile teamwork. That's why we believe that the best solution for your production facility can only be achieved by working together on an equal footing.

AGILE INNOVATORS

If you want to make progress, you first need to listen carefully. Your knowledge of the specific features and processes of your business is worth its weight in gold. But often, an outside view can bring new ideas to light. We combine your knowledge with our expertise in all aspects of production and support you on the way to achieving your maximum production potential.

MORE THAN SOFTWARE

Software projects are always an opportunity to optimize processes and drive improvements. This means that it's not just our excellent ERP and MES software that is important to us; we also pride ourselves on our highly competent advice and in-depth knowledge transfer—always on an equal footing. We find a custom solution for every challenge.

PSI SOFTWARE FOR OPTIMIZING FLOWS OF ENERGY AND MATERIALS

We stand for security and stability.

As a part of PSI Software AG, which has over 2000 employees and generates around 200 million euro in annual sales, we stand for security and stability. The PSI Group develops and integrates complete solutions based on its own software products for optimizing flows of energy and materials for suppliers and industrial users.

ENERGY MANAGEMENT

Process control and monitoring of network infrastructures for energy suppliers and transport companies:

- ✓ Intelligent network management
- ✓ Smart mobility
- ✓ Efficient energy trading

PRODUCTION MANAGEMENT

Software for production planning and control, logistics and optimization in industrial companies:

- ✓ Optimized use of resources
- ✓ Increased profitability
- ✓ Sustainable environmental compatibility

OUR COMPLETE SOLUTION

Software for AI, ERP, MES, WMS and SCADA.

PSI Automotive & Industry rounds off its portfolio with integrated solutions for the entire value chain; from logistics to manufacturing to after-sales service. The best AI, ERP, MES, WMS and SCADA software is available for this purpose.

PSI Logistics provides intelligent solutions for transparent material flows and efficient logistics management.

AI software for decision-making support, planning, control and optimization of complex business processes from **PSI FLS Fuzzy Logik & Neuro Systeme** – multi-criteria, industry-independent and in real time.

PSI Electrical Energy enables the holistic integration and development of all work processes involved in asset management and work preparation up to and including on-site fitters' tasks.
